

DEDICATED TO DISCOVERY®

Cutting-edge technology to enable
discovery, understanding and
protection of our oceans.

SECTORS

From Defence to Aquaculture, Ocean Science to Offshore Energy, our cutting-edge technology & unparalleled expertise enable ground-breaking science and long term customer success.

PEOPLE

Our team of Ocean Scientists and Engineers have a breadth of experience across science and ocean technology, to bring real-world insight into the application of different solutions to your project.

PRODUCTS

We supply powerful and innovative sensors, systems and platforms. Our technologies offer class leading performance and reliability.

OCEAN & ENVIRONMENTAL INSTRUMENTS

Map, analyse and explore the ocean depths with our range of surface and submersible sensors including ADCPs, CTDs, buoys, sonars, and complete measurement systems.

ROBOTIC PLATFORMS & SYSTEMS

Our wide range of ocean robots and unmanned systems enable risk reduction, cost-efficiency, reduced environmental impact, and can be the key to unlocking your project's full potential.

TRACKING SOLUTIONS

Durable, versatile and high-performance, we offer tracking solutions for a vast range of applications, including aquatic animal tagging, aquaculture, and passive acoustic monitoring.

SERVICES

PROJECT SUPPORT

Our engineering and ocean technology support team will always be keen to discuss your projects and applications, and the safe and successful use of our products and services.

TECHNICAL SUPPORT & TRAINING

We deliver high-level, front-line technical support for all of our products and services. Our training courses cover servicing, maintenance, data management and more.

RENTAL

We offer long-term rental of multiple product lines. For example, our Aquaculture Rental Systems allow fish farmers to unlock operational efficiency gains, to improve fish & environmental health, and to spread the cost.

“RS Aqua’s expertise and commitment to innovation has broadened the scope and depth of our market solutions.”

– Mark Jollymore, President of Innovasea
